Project description:

The project combines three different areas:

- Genetically modified organisms (GMOs);
- Protection of plant variety rights;
- Seed and seedling certification.

The project activities are split into three main components:

- Approximation of Ukrainian legislation;
- Organizational and operational review of Beneficiary;
- Organizational and operational review of phytosanitary laboratories.

The expected results of the action are legislation gap analysis with assessment report, transposed priority legal acts, reviews of institution's procedures, strategies and plans, standard operational procedures, trainings for officials and study visits.

Expected results:

The specific results by each component are:

- 1) 10 gap analysis with one common assessment report, priority list and approximation plan, transposed documents, review for capacity building, monitoring program, info materials;
- 2) functional review, operational plan upgrades, communication strategy, training for 100 staff members, 10 study visits;
- 3) functional review, strategy with action plan for accreditation, equipment list, SOPs, training for 90 staff members.
