**Опис проекту:** [ault.aspx](http://p4ec.md/en/news/EU_provides_assistance_to_ensure_the_rights_and_welfare_of_children)

The project will provide structured support to the Government of Moldova and the four LAs (Cantemir, Cimislia, Taraclia and Stefan Voda) to apply a system-wide approach towards primary prevention, family strengthening and preservation as key preconditions for the long-term development. At national level, the Government of Moldova will be supported in the nationwide expansion of the approved policies using innovative practices that proved to have a positive impact on child wellbeing. At local level, the project will focus in the four LAs to reconfigure the local childcare system by improving collaboration between the existing structures and services on primary prevention, strengthening families to nurture, protect and care for their children. The project will build capacities of local institutions and professionals to develop innovative psycho-social support services /programmes for children at risk, victims of violence and those left behind by parents. Strong emphasis will be placed on strengthening meaningful child participation in child welfare. Grassroots civil society organizations will be supported to mobilize community actors, establish sustainable partnerships and act as key partners of LAs in programme and service development.

### Очікувані результати:

- Legal acts revised.
- Methodological guides & training programmes on primary prevention developed & integrated; Professionals across sectors trained in the implementation of primary prevention legislation.
