Project description:

The project is aimed at overcoming the crisis situation and forcing the reform of museum accounting in Ukraine, as well as preparing materials for an emergency assessment of museum losses due to Russian aggression and ensuring the ability of museums to carry out effective digital accounting of museum collections.

Expected results:

R1. Crisis inventory component.

Developed and made available materials for estimating losses of museum due to Russian aggression (after 2015).

R2 Leap component.

Developed tools and solutions to increase the capacity of museums to digitize collections to unblock the implementation of the national reform of museum registration (stabilization measures).
