### Project description:

The aim of the project is to develop a participatory process including central and local governments and Civil Society in Ukraine at the reconstruction of the country during and after the war and achieve effective integration into the European Union. This will be accomplished by establishing a solid and reputable Expert Platform, which will engage in constructive dialogues with relevant international, national, and local stakeholders.

The ultimate objective of the Expert Platform is to actively participate in policy planning, decision-making, and the legislative process. Additionally, it aims to create a foundation for advocacy and outreach activities among various stakeholders, including experts, government officials, Civil Society, and the general public.

The role of such an Expert Platform will be key in the promotion of revival and reconstruction issues of Ukraine, with emphasis on key elements of Ukraine's European integration course, where EU and other international partners, together with the UA regions and civil society can elaborate the propositions for post-war reconstruction of Ukraine, jointly discuss burning issues and find new ways for constructive dialogue in selected areas (maritime infrastructure, culture, finance monitoring).

The project's overall objectives will be achieved by enhancing the participation of central and local governments, civil society organizations (CSOs), and civil society activists in the post-war recovery process, the EU integration of Ukraine,

### Expected results:

A policy dialogue is put in place among experts, officials and other key stakeholders to agree on a common vision for the Revival Agenda for Ukraine in selected areas. As a result of this dialogue and analytical work of experts there will be 6-8 statements, declarations, policy papers and analytics published on Expert platform.

At the end of the project a 10-20% increase of awareness and involvement in the post-war recovery process of Ukraine and EU integration is expected among the local and central governments and CSO and other key stakeholders based on the sociological survey results.

Conducting 6 conferences or public events on the issues related to Ukraine's Recovery exercise and EU integration process.

Well established, improved communication and increased awareness amidst the public on the results of the work of the Expert Platform and issues related to reconstruction and Revival Agenda for Ukraine in selected areas. The public events will be a networking platform for partnership to assist, support and direct stakeholders in their recovery efforts, based on the Revival Agenda for Ukraine and EU integration process. There will be 5-10 partnerships established during networking component of the events

**Funded by the  
European Union**
