

Developing knowledge-based European journalism relating to Europe's neighbours

Period of implementation: 01.01.2018 - 31.12.2019

EaP countries:

Armenia, Azerbaijan, Belarus, Georgia, Republic of Moldova, Ukraine

EU contribution: € 830 000

Implementing organisation(s):

College of Europe, Natolin Campus

Project website: e-jcn.eu

Project description:

The Project strengthens knowledge-based journalism and the capacities of communication/media centres, freelancers and multipliers, located in both the EU and ENP countries (East and South), in reliable, professional and data-driven reporting.

The Project is implemented through educational activities delivered by the Natolin Campus of the College of Europe in Poland.

Expected results:

- Media market analysis on the two ENP regions and the EU.
- Digital component: set of short on-line knowledge-based courses looking into topics related to the media market and journalism, including regional studies or the historical, cultural or environmental backgrounds of selected ENP regions. The courses are open to all who apply and include several e-learning modules.
- Workshops organised by the College of Europe in Natolin: the project will conduct five sets of courses. Each training will last around five days and consist of two parts: an intensive workshop in Poland, followed by an offsite training (study visit/field training in ENP or EU countries).
- Follow up assignments: contest/competition conducted by the participants of workshops in their home countries once the workshops have come to a conclusion.
- Developing a network of journalists, to exchange expert knowhow between EU and ENP journalists and other media market stakeholders (on-line media forum, final conference, after-project publications and journalism manual).
