Project description:

The project "Further support to the implementation of EU-Ukraine Association Agreement in the transport sector and of the National Transport Strategy in Ukraine" is aimed to contribute to the further development and reform of the transport sector in Ukraine. The project's experts assist to reinforce EU-Ukraine cooperation, help national authorities to adopt, implement and enforce legislation aligned with EU transport legislation, contribute to improving road safety conditions, and achieve objectives of the National Transport Strategy.

Expected results:

The following results are expected at the end of the technical assistance:

- Adoption and implementation of the AA obligations in transport sector
- Institutional capacity of the national authorities is improved for better implementation and enforcement of the new legislation aligned with the EU legislation
- The respective know-how and European best practice is introduced and implemented in Ukrainian transport institutions to improve their performance, taking into account the organisational, managerial, technical and other issues relevant to the sector performance
- Further implementation of the NTS 2030
- Road safety strategy and action plan 2021 - 2030 approved and in implementation
- Improved institutional capacity for road safety for better implementation of strategies and enhanced enforcement
- Improved logistics legal framework
- Public relations, communication and advocacy capacity is improved
